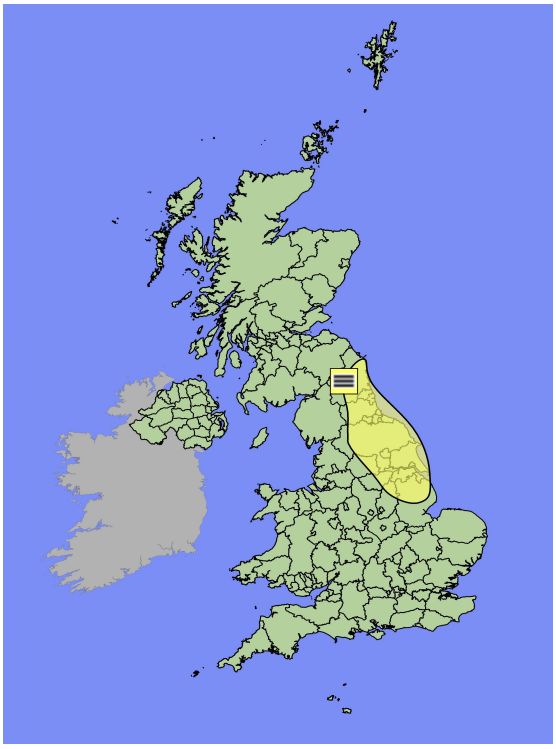
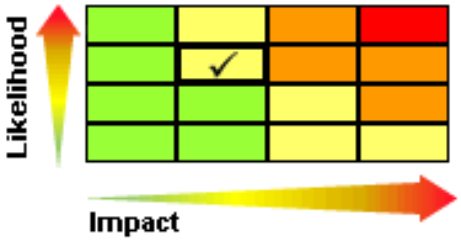
National Severe Weather Warning Service





Chief Forecasters Assessment
As temperatures fall quickly this evening some locally dense patches of fog are likely to form, especially in the Vale of York. There remains uncertainty regarding the location and extent of the densest fog patches. Although the worst of the fog should clear mid to late Sunday morning, some fog patches may linger for longer, especially near the coast.

The Met Office have issued a **Yellow Warning** of **Fog**

Valid from **22:00 on Sat, 24th Mar 2012** until **10:30 on Sun, 25th Mar 2012**

Patchy fog will develop on Saturday evening and become locally dense and more widespread, with visibility below 100 metres in places. The fog will clear slowly during Sunday morning. The public should be aware that driving conditions are likely to become difficult.
